

Congratulations Distribution Technology: 50 Years of Strengthening Supply Chain for Hundreds of Partners with Innovation, Warehousing & Transportation!

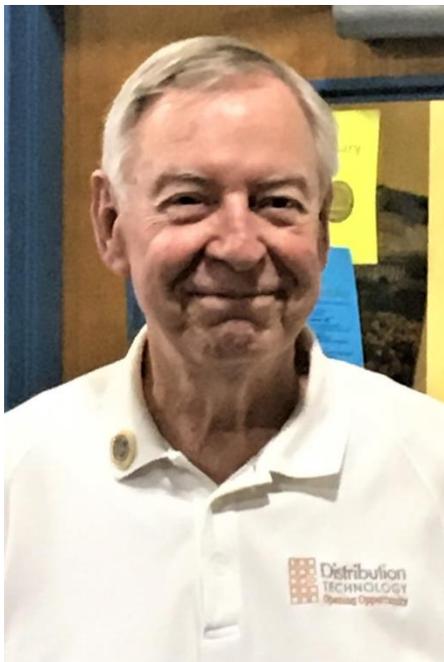

Distribution TECHNOLOGY

CHARLOTTE, N.C. June 10, 2019 – Distribution Technology proudly soared beyond the half-century mark for the company last week, celebrating its successes and growth with the entire team.

Since 1969, the family-owned and operated asset-based third- party logistics and transportation company has helped partners launch new businesses, respond to rapid-growth and expansion from small and medium sized businesses to large national and international organizations.

Company founder and Chairman of the Board, Rock Miralia told team members *“It isn't easy to start a business, find and recruit the people to perform the service tasks required and achieve the success we have enjoyed for 50 years”*.

Rock went on to say, *“I have followed some basic beliefs since our beginning that are keys to our performance. We believe and follow the Golden Rule – to treat others as we would treat ourselves, and to share our financial success with all our associates through Profit-Sharing. Our work environment should resemble a family company, where we help those in need the best we can. It was at our earliest Employee Committee Meeting that we adopted our motto, ‘Best People - Best Warehouses’”*.

President & CEO, Tom Miralia noted, *“For the past five decades our company has strived to provide creative, innovative, effective warehouse handling, storage, and transportation services for our clients. By working with us they are offered a competitive edge to help grow their business. Our goal is to help them grow and grow with them!”*
